Application Bundles

MONEY SAVING BUNDLES FOR THE 4, 5 AND 6 SERIES MSOs

Application bundles are a great alternative to purchasing individual options, especially if you plan to address diverse applications with your oscilloscope. Compared to individual options, these specially designed bundles:

- Offer better value with more functions at a much lower cost than equivalent individual options
 - Make it cost-effective to purchase capabilities to cover future needs or needs across engineering teams
 - Include the most frequently combined options for key applications and industries
 - Provide flexibility to adjust year-to-year with lower cost 1-year subscriptions

Pro Bundle | Automotive

Especially for ECU designers, this bundle provides outstanding system visibility for validations and troubleshooting. It includes support for important automotive protocols, and serial standards compliance testing and debugging.

Automated decoding and triggering speeds debug.

Unique signal separation for Automotive Ethernet on 5 & 6 Series MSOs.

Ultimate Bundle

The Ultimate Bundle offers the most capabilities and the highest savings in a single package.

It includes:

- All the capabilities of the Starter Bundle, including embedded serial decode/trigger and integrated AFG
- All the capabilities of ALL Pro Bundles
- Increased record length on the 5 and 6 Series MSOs, – 500 Mpoints on the 5 Series MSO or 1 Gpoints on the 6 Series MSO.
- Wideband, synchronized spectrum analysis
 - Spectrum View RF vs. time waveforms and triggering
 - Expanded spectrum capture bandwidth
- Video triggering
